

*"Hi sir, I am Pavan kumar P. I am from kolar. I completed My BE mechanical from CBIT KOLAR in 2018.*

*I did a job 1year as a quality engineer in track tech international private limited. later immensely interested in data science to take the career in data science I choose Edyoda as a platform .. now I'm teaching tuition as a part time and learning data science in Edyoda.*

*During the pandemic , I have developed an interest in data science .. I have gone through some courses online and gained some basics. I tried to implement my knowledge. Everything was going well. but one day I realize my knowledge be arranged in proper order. So I felt I need career guidance in the field of data science. Then I got to know about the data science course at Edyoda . I showed up my interest and started learning stuff.*

*Now My short term goal is to get a good placement from Edyoda ...and long term goal is to achieve a good position where I build my career and helps the organization too..*

*Telling about my family .My father is a carpenter, and my mother is primary school teacher. I have a elder sister she is already married.*

*I love drawing and have represented my school in many competitions. And also I love travelling that's makes improves me very special talent by visiting historical places..*

*thank you*
